

Vignesh M

Personal & Professional Profile

About Me

I am Vignesh M, a junior software developer with a strong interest in backend development, document-based AI applications, and modern web technologies. I have a B.Sc. Mathematics background and have developed my software skills through structured full-stack training, an Android development internship, and hands-on project work.

Personal Details

Name	Vignesh M
Native Place	Ponnavarai, Thiruvaiyaru, Thanjavur District, Tamil Nadu
Family	Four members
Mother	Sasi
Father	Murugan
Younger Brother	Gokul

Education Journey

Stage	Details
Primary Education	Studied from Classes 1-4 in Ponnavarai.
Classes 5-10	Studied in the Ayyampet area at St. Antony's High School and completed the SSLC stage with approximately 71%.
Higher Secondary	Studied Classes 11-12 in the Maths-Biology group at SIMS School, Valathur, Thanjavur District, and scored approximately 55%.
Undergraduate	B.Sc. Mathematics — A.V.V.M. Sri Pushpam College, affiliated with Bharathidasan University.

Professional Development

Java Full Stack Development — Payilagam Institute, Velachery: Completed training covering Java, Spring Boot, PostgreSQL, HTML, CSS, and JavaScript.

Android Developer Internship — Netaxis IT Pvt Ltd: Worked with Java/Kotlin, Room Database, XML, and Android application development.

Current Focus: Backend development using Node.js, Express, TypeScript, PostgreSQL, TypeORM, REST APIs, authentication, file processing, queues, vector databases, and LLM/RAG applications.

Technical Skills

- Java, JavaScript, TypeScript
- Node.js, Express.js
- Spring Boot — basic knowledge
- PostgreSQL, MySQL, TypeORM
- HTML, CSS
- REST API development and authentication
- Qdrant / vector database concepts
- LLM, embeddings, chunking, and RAG concepts
- Redis and BullMQ concepts
- Git and GitHub

Main Project — Ragfish

Ragfish is a document-based chat application focused on allowing users to upload documents and ask questions about their content. The backend is being developed with Node.js, Express, TypeScript, PostgreSQL, TypeORM, Qdrant, Redis/BullMQ, and LLM integration. The application uses document extraction, chunking, embeddings, vector search, and retrieved context to generate answers based on uploaded documents.

Career Goal

My goal is to grow as a software developer by building reliable backend systems and practical AI-enabled applications. I am particularly interested in Node.js backend development, RAG systems, vector databases, knowledge graphs, and production-ready API design.

Profile prepared from the personal, educational, and professional information provided by Vignesh M.
